HOW PILLS ARE MADE

The Custom of taking medicine in the form of pills dates far back in history. The object is to enable us to swallow easily in a condensed form Details of the disaster at Prescott show that a disagreeable and nauseous, but very useful, drugs To what vast dimensions pill-taking has grown house remains where it passed over. Happily may be imagined when we say that in England pills are consumed every year. In early days pills were made slowly by hand, as the demand was comparatively small. No form of medication can be better than a pill, provided only it is intelligently prepared But right here occurs the difficulty. Easy as it may seem to make a pill, or a million of them there are really very few pills that can be henestly commended for popular use. Most of them wither undershoot or overshoot the mark. As everybody takes pills of some kind, it may be rell to mention what a good, safe, and reliable B. Layton, Esq. CHIEF MANAGER. parthould be. Now, when one feels dult and alcepy, and has more or less pain in the headsides, and back, he may be sure his bowels are constipated, and his liver sluggish. To remedy this unhappy state of things there is nothing tike a good cathartic pill. It will act like a charm by stimulating the liver into doing its duty, and ridding the digestive organs of the accumulated

poisonous matter. But the good pill does not grips and pain us, neither does it make us sick and misorable for a few hours or a whole day. It sets on the entire glandular system at the same time, else the after-effects of the pill will be werse than the disease itself. The griping caused by most pills is the result of irritating drugs which they con-Such pills are harmful, and should never be used. They sometimes even produce bemorrhoids. IMPERIAL QUARTO ENGLISH AND CHINES:
DICTIONARY. DICTIONARY. WITH THE PUNTI AND MANDARIN ${f Pronunciation}.$ An Anglo-Chinese Dictionary, publicat the Daily Press Office, Hongkon, For comprehensiveness and practica service this Work stands unrivalled. All the new words which the Chinese have of late years been compelled to coin to express the numerous objects in machinery, photography, telegraphy, and in science generally, which the rapid advance of foreign relations has imposed upon them, are here given in extenso. Each and every word is

fully illustrated and explained, forming exercises.

displays the success of an attempt to make the Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously attained, and dispensing with those vast margins and vacant spaces which have heretofore characterized Chinese publications. To illustrate the vast scope of the work the following facts are submitted for consideration:-Chaimers' Vocabulary contains about 16,000 Chinese characters, and Medhurst's English and Chinese Dictionary about 100,000, whilst this work contains more than 50,000 English words, and upwards of 600,000 Chinese characters. Again, despite all the grammars and other elementary works as yet published, the student of this difficult language absolutely re-

quires examples to display the various appli-

cations and equivalents of different words which

have one general meaning. Of these examples

this work contains more than five times as many as any other Dictionary hitherto pub-For practical purposes the arrangement of the work is so complete, that a reference to its pages enables a person who understands English to communicate effectively with natives who understand nothing but Chinese. In this respect the work will be found indispensable to all Europeans residing in China, and to the natives themselves it explains subjects fully with which very few indeed of them are perfectly acquainted. To parties resident in England and interested in China it cannot but be invaluable occasion-

that has claused since Hume went urstairs. " If I might suggest——" begins he. "Go away!" cries Nan sharply, severely, who is quivering in every nerve, and who is making a desperate battle with horself, to refrain from the humiliation of tears-tears that are dangerously near her.
